Our expedited patent research takes 2 weeks to complete and costs **\$849**. We conduct a complete search that includes all U. S. patents and foreign patents including European Patent Office (EPO) and Patent Cooperation Treaty (PCT) patents. We then provide copies of relevant patents, a thorough evaluation, and a written patentability opinion to inform the inventor of his potential patent rights. A written patentability opinion is a useful tool for pursuing licensing agreements and/or venture financing and is required by most corporate innovators.
